Cloud-based Service Management

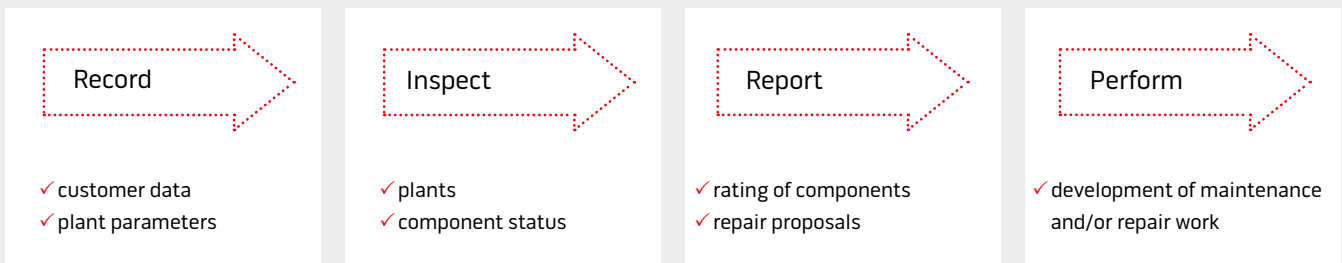

REMA MCube & REMA CCube Service Cloud-based Service Management

STATUS OPTIMIZED MAINTENANCE WITH REMA CCUBE

CCCube stands for Command, Control and Communicate. The service management system supports our qualified REMA TIP TOP staff with inspections on site. REMA TIP TOP thus offers additional services for customers who want to continuously improve their plant maintenance systems and reduce maintenance costs.

The secure cloud-based system enables an efficient, controlled maintenance workflow for any equipment in the field of material processing and preparation as well as many other areas of conveyor technology. REMA CCube provides real-time reporting and planning of maintenance and inspection activities while minimizing unplanned downtime.

Manual inspections will soon be a thing of the past as the digital twin of the plant is an accurate virtual copy of the real plant and any operating parameter will be visible on the screen.

The added value of REMA CCube's Industry 4.0 concept includes simplified planning and problem identification, efficient digital information management and fast and comprehensive reporting.

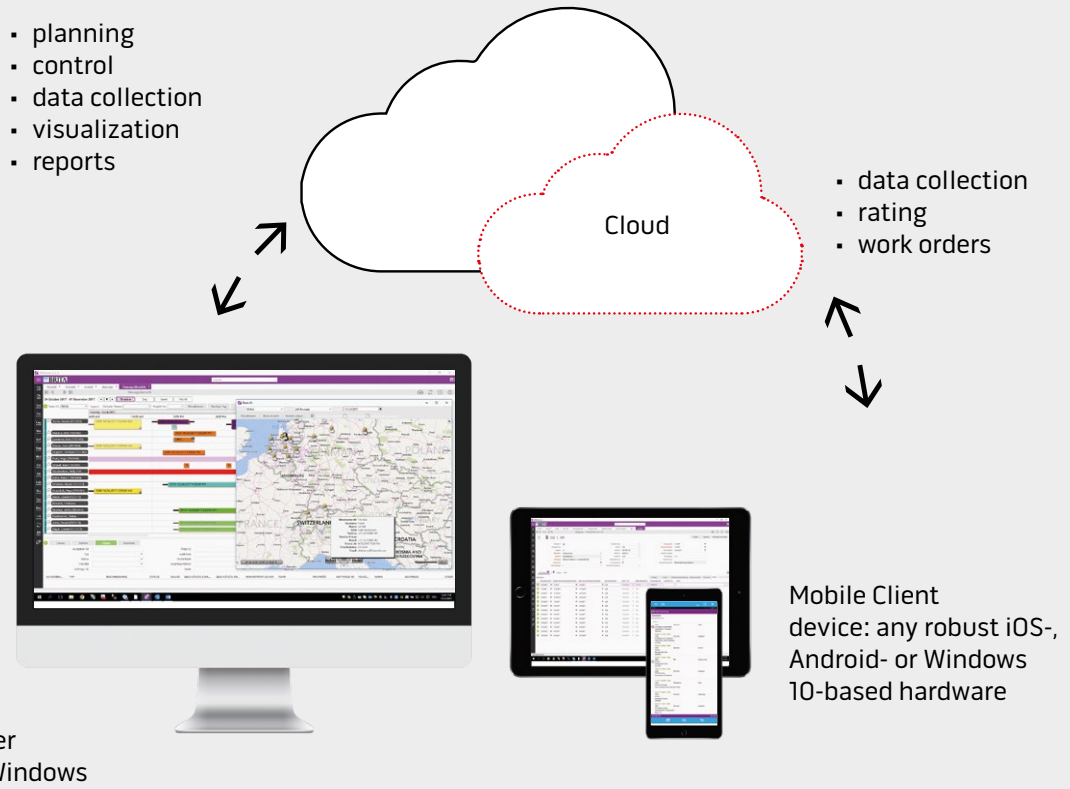

Already now, REMA MCCube and REMA MCUBE offer customers the option of digitizing their service. REMA TIPTOP is constantly developing new and innovative technologies to make the full IoT (internet of things) potential available.

Customer benefits:

- Improvement of system downtimes and minimization of unplanned downtimes
- Increase of productivity and performance
- Cost reduction
- Planning of maintenance work, downtimes and repairs
- Better information for an improved flow of purchasing and procurement logistics

REMA MCube & REMA CCube Service Cloud-based Service Management

SYSTEM STRUCTURE

REMA TIP TOP CCUBE SYSTEM KEY FEATURES:

- A central global system that works with local offline-enabled clients
